

PowerMic™ II Speech Recognition Hand Microphone

The Dictaphone PowerMic™II from Nuance is specially designed for enhanced physician productivity, providing ergonomic control of both standard dictation and speech recognition functions. The PowerMic II microphone offers simplified single-handed, thumb-control operation for dictating, navigating, reviewing, and editing speech recognition generated documentation.

Full Dictation Control

The PowerMic II advances physician PC dictation, making it easier and faster to control voice recording, navigate and select fields in on-screen templates and standard reports, and move throughout recognized text reports for review and editing.

In addition to complete dictation control, the PowerMic II incorporates full-function, Microsoft® compatible, PC-Mouse capabilities into the hand microphone, to reduce the need

for care givers to have to continually move between the microphone, mouse, and keyboard.

With the PowerMic II, users have the ability to rapidly navigate report template fields, then record and use "voice fill-in" capabilities to insert recognized text into report template fields.

By combining an ergonomic hand microphone with PC mouse functions, physicians will gain new levels of dictation speed, ease-of-use, and productivity.

FEATURES AND BENEFITS

- *USB connectivity for easy plug-and-play installation and transporting as well as elimination of need for sound card enabled PCs.*
- *Integrated Barcode Scanner (optional model) for entering MRN, accession number, or other barcode-driven data, with audible feedback upon successful barcode scan.*
- *Includes new, wall-mountable, microphone holder.*

Flush, angled microphone element, for user comfort and optimal recording level/signal.

Primary Dictation Controls
Record, Rewind, Play, Fast Forward, Enter/Select

"Track-Point" Button and Left/Right "Mouse" Button to control the onscreen cursor, navigate and select functions.

Transcribe Button to recognize speech or send dictation to a transcriptionist automatically, when physician self-completion is not utilized.

Tab-Forward/Tab-Backwards for speeding navigation through voice-driven templates and form fill-ins.
